PROFILE

.NET Developer with around 7 years of experience designing, developing, and maintaining enterprise applications and distributed systems. Experienced in C#, .NET, microservices, REST APIs, event-driven systems, and cloud-native environments, with a strong background in insurance and IoT. Familiar with DDD, CQRS, Event Sourcing, Clean Architecture, and SOLID principles, with hands-on experience across backend development, Angular frontends, and containerized deployments.

WORK EXPERIENCE

Blazar Group | .NET Developer

August 2023 – Present

- Develop and maintain enterprise applications for the insurance sector using .NET and microservices architectures.
- Design REST APIs and integrations across distributed services, databases, and enterprise systems.
- Manage containerized applications and deployment environments with Docker, Kubernetes, Helm, and Docker Swarm.
- Implement asynchronous and event-driven integrations using RabbitMQ and Kafka.
- Support scalable backend architecture, application monitoring, troubleshooting, and production deployments.

Alten Italia | .NET Developer

May 2022 – August 2023

- Developed and managed a microservice for customizable bulk SMS delivery, including alias-based sending.
- Maintained legacy applications built with ASP, ASP.NET, and AngularJS.
- Developed an Angular 13 frontend for the new messaging management platform.
- Integrated frontend applications with REST APIs and existing enterprise services, supporting maintenance and legacy modernization.

4Solid | .NET Developer

September 2019 – March 2022

- Developed microservice-based Industry 4.0 and IoT applications using DDD, CQRS, and Event Sourcing.
- Implemented Modbus RTU data acquisition from electrical analysis devices.
- Developed JWT Bearer authentication and authorization for IoT device management systems.
- Implemented event-driven communication using Azure Service Bus and Azure Event Hub.
- Managed Azure App Services deployments and versioned Docker images for a WPF smart-valve application on Raspberry Pi devices.
- Developed WPF/MVVM applications for statistical measurement control, industrial data management, and spring design and sizing.

TECHNICAL SKILLS

Backend
C# · .NET / .NET Core · ASP.NET Core · REST APIs · Entity Framework Core · LINQ · MediatR · FluentValidation

Architecture
Microservices · DDD · CQRS · Event Sourcing · Clean Architecture · SOLID · Dependency Injection · Event-Driven Architecture

Messaging
RabbitMQ · Apache Kafka · Azure Service Bus · Azure Event Hub

Cloud & DevOps
Microsoft Azure · Docker · Kubernetes · Helm · Docker Swarm · Azure DevOps · CI/CD

Frontend
Angular · TypeScript · RxJS · NgRx · HTML · CSS

Databases
SQL Server · MongoDB · EventStoreDB

Desktop & IoT
WPF · MVVM · Raspberry Pi · Modbus RTU

Tools
Git · Visual Studio · Visual Studio Code · Postman · Swagger / OpenAPI · OpenTelemetry

EDUCATION

I.S.I.S. J.M. Keynes

September 2014 – June 2019

High School Diploma
IT Specialist / Computer Technician

LANGUAGES

Italian — Native
English — Basic working proficiency

CORE STRENGTHS

- Enterprise & insurance systems
- Distributed systems & microservices
- IoT / Industry 4.0
- API & system integration
- Cloud-native deployments
- Legacy modernization
